To Whom It May Concern:

Our organization has about 80 cell phones and blackberries and our wireless phone bill was becoming increasingly expensive and very difficult to understand and manage. In an effort to cut costs and fully understand the services we were receiving from our provider we engaged the services of Drew Polin from OpDecision.

OpDecision was able to not only help us achieve significant savings off our cellular bill but also provided us with much needed customer service that we were having a difficult time getting from our wireless provider.

Being a non-profit, our charge is to direct as much of our resources as possible toward helping patients get life saving transplants and OpDecision has certainly helped guide us in that direction. Being able to get our cell phone expenses and issues in order without having to change providers was a big benefit to our organization.

It is for these reasons that I would highly recommend OpDecision.

Sincerely,

Robert Finkel
Director of Finance
